

# Jordan Single Notes Algerian Book Blaze

Without previous local notice, a 25 fils multicolored stamp appeared in the Jerusalem, Jordan post office July 14 to note the burning of the library in Algeria.

The design shows a fire scene at the left and a burning lamp of knowledge at the right; the principal color is green, as indicated by an example supplied by a correspondent in Jerusalem.

The stamp is quite similar to that favored by Egypt and other Arab area nations to mark the same event. Lettering is in both English and Arabic, with printing in the Egyptian "no border" style.
