## **Palestine: The Plate Varieties of the London II (Waterlow) Issue**

### **Part Two**

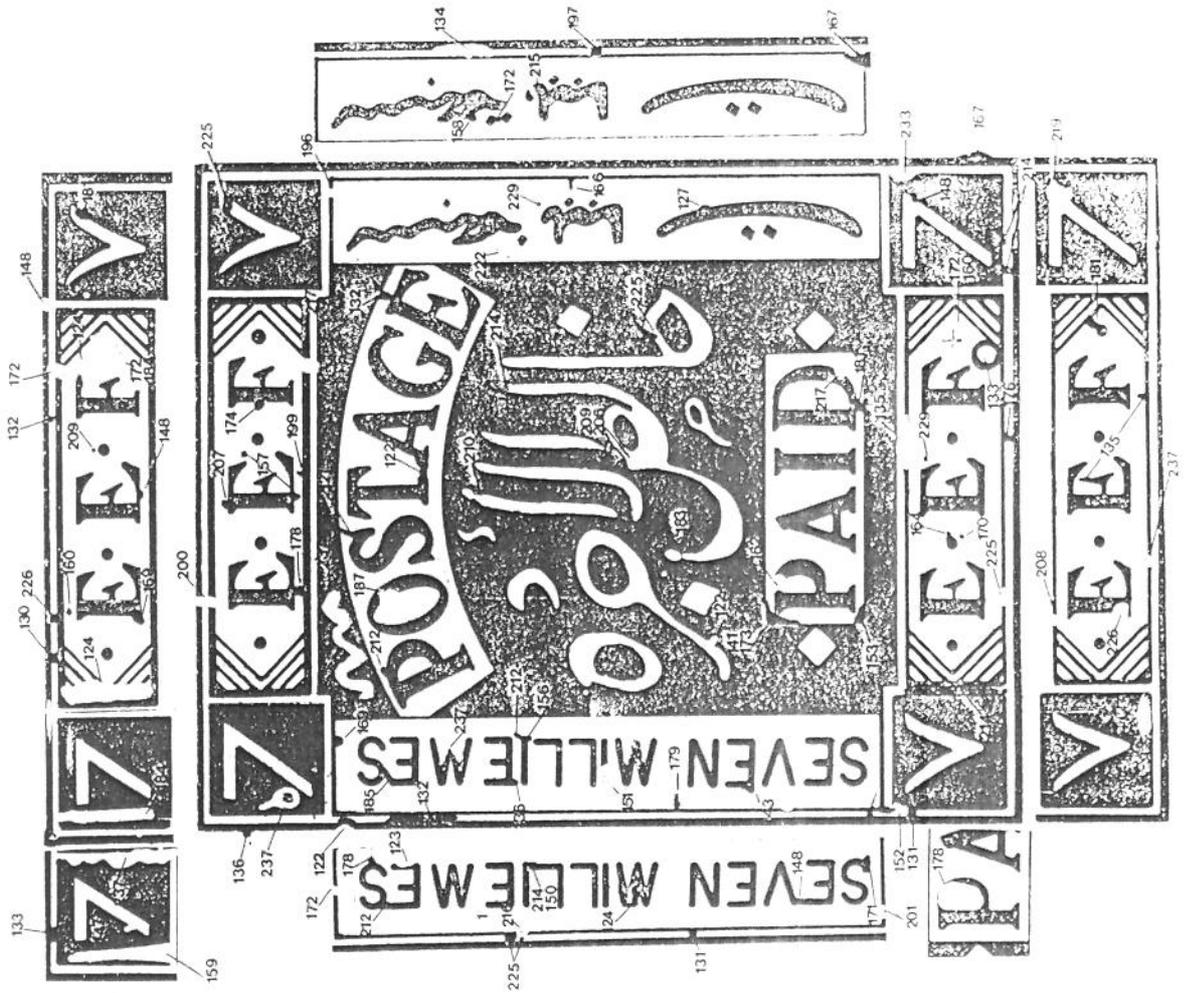

**Dr. A. Kaplanian**

The first part of this extended article appeared in the previous BAPIP Bulletin (Number 142, pages 55-57) and dealt with the plate varieties of the Piastres values, viz. The 1, 2, 5, 9, 10 and 20 Piastres. In this second part the plate varieties of the 7, 8 and 13 Milliemes are illustrated: two pages for each as the varieties of these denominations are numerous. The third and final part of this article dealing with the plate varieties of the 1 through 6 Milliemes will be published in the next issue of the Bulletin.
